

TOUR SERIES

Local Venue, World-Class Event

World Class Conference at a Local Venue

NFJS events are informal and provide an unmatched opportunity to interact with high quality speakers. Many of our speakers are the same people you will see speaking at JavaOne and other national events. Come to NFJS and make your training dollars go further. We bring a high-quality technical conference to your city... no travel required.

Develop Your Skills

We help developers: improve skills, solve problems, and be productive. Some of the current topics covered include: Core Java, Java 7, Languages on the JVM, Agility, NoSQL, REST, and Mobile Development. Our events typically offer five concurrent sessions. During an event, there is always an interesting session available to you.

Cutting Edge Technologies

Stay up-to-date with the latest enterprise technologies. Develop better and faster. With over 50 sessions to choose from, a weekend at NFJS is a great opportunity to learn new skills.

Agile Practices

Software is a difficult industry with very high rates of failure. Agile practices such as: **Test Driven Development, Continuous Integration, Code Quality Measures, and Team Building** methods stabilize your processes and improve quality, allowing teams to work better and faster.

Peer Exchange

Do you want to solve a problem? Get a fresh opinion. Few developer problems are truly new! NFJS is a great opportunity to interact with your peers and exchange ideas.
